

Environmental Policy

- Radwin is committed to environmental affairs leadership in all of its business activities.
- Provide a safe and healthful workplace and ensure that personnel are properly trained and have appropriate safety and emergency equipment.
- Conserve natural resources by reusing and recycling materials, purchasing recycled materials, and using recyclable packaging and other materials.
- Develop, manufacture, and market products that are safe for their intended use, efficient in their use of energy, protective of the environment, and that can be reused, recycled or disposed of safely.
- Use development and manufacturing processes that do not adversely affect the environment, including developing and improving operations and technologies to minimize waste, prevent air, water, and other pollution, minimize health and safety risks, and dispose of waste safely and responsibly.
- Ensure the responsible use of energy throughout our business, including conserving energy, improving energy efficiency, and giving preference to renewable over non-renewable energy sources when feasible.
- Meet or exceed all applicable government requirements and voluntary requirements to which Radwin subscribes.
- Strive to continually improve Radwin's environmental management system and performance.
- Conduct audits and self-assessments of Radwin's compliance with this policy, measure progress of Radwin's environmental affairs performance, and report periodically to the high levels of management.
